Housed within the Energy Efficiency Center at Oregon State, the IAC is funded by the US Department of Energy and the Industrial Technologies’ Industrial Assessment Center (IAC) program and offers no-cost, full scope energy and efficiency assessments to industry.

The assessment process entails a one day visit to your facility after collecting preliminary information. The team of analysts will tour your site, brainstorm on potential savings opportunities and devote the remainder of the day to collecting data that supports an analysis. Within a typical 60 days, a report is delivered with specific recommendations to reduce energy and waste stream costs and increase productivity and profitability.

The OSU EEC has a full compliment of state of the art equipment for analyzing:

- Boilers
- Pumping Systems
- Combustion efficiency
- Lighting
- Cooling and refrigeration systems
- Heat exchangers

**RECORD OF SUCCESS**

Number of Assessments Completed

**645**

Total Recommended Energy Savings

**1,449,948 MMBtu**

Total Recommended Cost Savings

**$149,511,027/year**

Total Implemented Cost Savings

**$35,185,535/year**

Average payback on implementation

**1.4 years**

Average Cost Savings

**$17,000/year**
Facility schedules an assessment → IAC analysts collect preliminary information → IAC analysts complete a facility walk-through and collect data on site

Facility receives a report from IAC within 60 days → Facility implements recommended changes → Facility reports actual resulting savings to the IAC

FACILITIES ELIGIBLE FOR FREE ASSESSMENT
- Gross annual sales less than $100 million
- Fewer than 500 employees at the plant site
- Annual utility bills between $100,000 and $2.5 million

*There are exceptions to each of these requirements. We consider assessments on a case by case basis. Please contact us for more information.
